

# AliKhatami

Programming is an art form and every key stroke should reflect passion.

Web Developer

## What I Do

Design, **develop**, and inspire. I build **web experiences** for big clients with even bigger data. I love jQuery, C# .NET, **MVC design patterns**, Windows 8 app development, Windows Phone 7/8 development and anything that challenges me. I write code with a passion.

## Who I am

My name is **Ali Khatami**. I am a **web developer** (of the senior variety), car fanatic, jQuery evangelist, avid **cyclist** and dog lover. I build websites with big data and love a challenge. I have a fresh outlook and a **thirst for knowledge**; I am always learning. I also like Chinese food.

## Where I've Been

### Markit On Demand 2009 - Present

Senior Web Developer

- # Responsible for leading teams of developers on large scale projects
  - # Served as lead developer for client and server side components
  - # Introduced and maintained libraries and plugins used by 100+ developers
  - # Facilitated discussions for integration, status updates, and project proposals with clients
- Technologies Used:** C#, .NET 3.5/4, MVC 2/3, jQuery, HTML5, CSS3, NUnit, Canvas, Bootstrap

### Gray Web Technology + Design 2008 - 2009

Special Projects Manager/Developer/SEO Specialist

- # Quoted, designed, and developed new projects with clients
  - # Took projects from design phase through development and on to production
  - # Restructured and laid foundation for new SEO/Social Media division
- Technologies Used:** C# .NET, Google AdWords, Sitefinity CMS, jQuery, CSS, Flash

### University of Texas at San Antonio Career Services 2008 - 2009

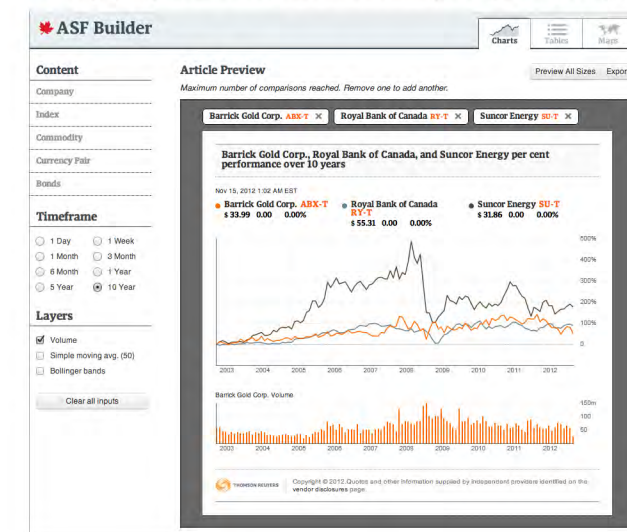

Web Developer

- # Responsible for entire web presence and updating site from table base layout to CSS based
  - # Redesigned and rebranded entire site (other departments later followed our initiative)
  - # Integrating custom forms, live chat, and interactive Flash modules
- Technologies Used:** HTML, CSS, Flash, ColdFusion
